Such revenue growth was attributable to the higher average unit price of the newly delivered properties. The decrease in revenue from community value-added services was mainly due to a decrease in revenue from turnkey furnishing services.

Cost of sales

15. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance manager reports directly to the chief financial officer and the audit committee. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer. The valuation process and results are discussed with the audit committee twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair value of the unlisted equity investment has been estimated by using the market approach, using the ratio of price to book value ("PB ratio") of certain comparable companies in the same industry, in arriving at an indicated value of the unlisted equity interest. The valuation takes account of a discount for lack of marketability on this investment. The directors believe that the estimated fair values resulting from the valuation technique, which are recorded in the consolidated statement of financial position, and the related changes in fair values, which are recorded in other comprehensive income, are reasonable, and that they were the most appropriate values at the end of the reporting periods.

Set out below is a summary of a significant unobservable input to the valuation of financial instruments together with a quantitative sensitivity analysis as at 30 June 2025 and 31 December 2024:

Valuation technique	Significant unobservable input	Range	Sensitivity of fair value to the input
Unlisted equity investments	Valuation multiples	Discount for lack of marketability ("DLOM") 25% to 30% (31 December 2024: 25% to 30%)	5% (31 December 2024: 5%) increase/decrease in DLOM would result in a decrease/increase in fair value by RMB223,000 (31 December 2024: RMB223,000)

The discount for lack of marketability represents the amounts of premiums and discounts determined by the Group that market participants would take into account when pricing the investments.
